## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expression "the plane" (claim 6) has no definite antecedent basis in the claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wyler et al. The patent to Wyler et al teaches structure as claimed including a reinforcement structure (32), foot member (166), gusset (22) attached to the inner wall of a foot member.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3637

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wyler et al in view of Vandament. The patent to Wyler et al teaches structure substantially as claimed as discussed above including foot member and reinforcement member the only difference being that the reinforcement member is not "bowed" and the foot member is not foam filled. However, the patent to Vandament (16, 18) teaches the use of providing a supporting member with a pre-stressed reinforcement member that is foam filled. It would have been obvious at the time of the invention to modify the structure of Wyler et al to include a pre-stressed member that is surrounded by foam in the support, as taught by Vandament since such reinforcement structure is shown to be old in supporting structures thereby providing structure as claimed.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Allgeyer et al, Breezer et al, Brandenburg, Frankenberg, Ohanesian teach structure similar to applicant's.
